

**Summer Activities for students going into Grade 3  
2024-2025**

**Reading**

Keep reading books you enjoy! A good guide is 20 minutes per day.

**Math**

Math skills need to be kept sharp for 3rd Grade, please practice addition, subtraction, division and multiplication daily. When you practice, you will find that your math skills will be strong and you will be successful at the beginning of the school year. Some suggestions are for you to go online and find some free math websites, work with flashcards, make sure that you know the basic addition, subtraction, multiplication and division facts. The Dollar Store is a great resource for flashcards.

**Cursive Writing**

This question is asked all of the time, "Do I have to use cursive?" the answer is "YES", so practice what you have learned this year and come in feeling confident that you know what you are doing. Remember, you will continue to use cursive until you graduate from Notre Dame Academy.

See you in September!
